

Group approach

Group work gives students the opportunity to engage in process skills critical for processing information, and evaluating and solving problems, as well as management skills through the use of roles within groups, and assessment skills involved in assessing options to make decisions about their group's final answer.

Online learning.

I used online learning during Covid 19 pandemic when there was no chance of face-to-face teaching. This method worked very well since from then I still use it in some sections of my teaching and learning engagements.

Experiential learning

In the Department of Environmental Health, we engage our students on Work Integrated Learning (WIL). This programme runs during June recess and our students are allocated in different Municipalities and other relevant departments for exposure and experience of the practical side of learning. I always monitor this process and interact with stakeholders during my visits.

Blended learning

1. A blended learning approach ensures that the learner remains engaged and in control of their own individual learning experience.
2. As this is not just learning by listening, blended learning follows an interactive approach by mixing traditional classroom training with online sessions. Many more senses and skills are engaged in the process.
3. Face-to-face interactions follow online self-studies, or vice versa, thus optimizing and reinforcing the unique benefits of each.
4. Knowledge gained in the real and digital worlds allows you to develop your critical thinking and problem-solving skills in the specialized subject area.
5. Knowledge retention is significantly improved with a variety of interactive elements in the learning process, built-in assessment and feedback.

Student-centred learning

A student-centered classroom or student-centered learning environment is a model of teaching which emphasizes students' independence in the process of gaining knowledge. students are

more involved during lessons, while I mostly guide or help them by giving assessments or advice.
